Description

I believe that in Tiki 20x the 'header' field is not entirely working - when viewed on Wiki pages, a header field is displayed in simple text, not H1, H2, H3, etc., nor does the 'no toggle, open, closed' functionality work - all are just 'no toggle'.

Thanks,

Mike

Hi again,

when will someone be able to fix this? This tracker field is important to visually break up pages, so is something that will be noticed as a bug (e.g. high viability)

While I'm not 100% certain, I strongly suspect this is a 5 min. fix 😊

Thanks,

Mike

<https://sourceforge.net/p/tikiwiki/code/71141/>

This fix the headers not appearing as headers both with tracker_legacy_insert on/off.

It doesnt solve the toggle issue though.
