Description

Hello,

I come across a difference of results on what look to me the same thing and want to check if someone see an error on my side before posting a bug report.

When I run the following;

No results for query.

It output wrong values:

Bernard | 38

Bernie | 9.5

Bernadette | 46

Bernardo | 46

...

When I run this

There is a query error in the sort control block, please correct it to find results.

It output:

Bernard | 92.5

And that's the right number.

The show instance (was slow to load) seems to have been reseted. ??♂
If I stumble on this I'll re-open.
