Description
    Currently in the tiki.org forums ("Last update from SVN (20.2svn): Monday 02 December 2019
    04:56:58 JST- REV 73848"), when you preview a post/reply, the page refreshes in its original state
    before you wrote the post/reply. The post/reply content is lost.

    Just happened to me on 21.x - dull

Hmm, i just tested it several times and of course it worked ok each time, but i was just typing "preview test" - it was when i spent 10 minutes typing a proper reply to Gour that it failed of course!

Very edgy...
