    - ⊗ Plugin insert / editing inline is broken (regression)

Description
    Tested in my Chrome browser all edit plugin helper icons do nothing currently on tiki.org
    E.g. clicking the jigsaw puzzle icon on https://tiki.org/Roundtable+Meeting+2020+01 (with
    javascript:void() link) does nothing. Same on doc.tiki.org

    No errors in Google chrome Console appearing.

    Can anybody confirm/reproduce?

    Google Chrome is up to date
    Version 79.0.3945.130 (Official Build) (64-bit)

Solution
    This appears to be in the "social" layout template `social` which ends up with the modal divs being
    nested inside the `#row-middle` div, not at the top level of the body...

    Fix coming i hope...

Curious, no errors, just no popups, and on another 20.x svn fairly up to date (on r75295) they work fine. It also doesn't work on doc (which is also on r75295) - so is it something in the custom head or footer code on *.tiki.org?

More sites where it does not work (could it be Fivealive-lite theme related?):

- dev (Last update from SVN (20.2svn): Friday 17 January, 2020 02:43:27 CET- REV 75295)
- themes (Last update from SVN (20.2svn): Friday 17 of January, 2020 02:43:27 CET- REV 75295)

Where it works:

- profiles (Last update from SVN (15.8svn): Tuesday 24 of December, 2019 04:02:14 GMT-0000- REV 75210)
- branding (Last update from SVN (15.8svn): Tuesday December 24, 2019 04:02:14 GMT-0000- REV 75210)
- http://hman-11504-7233.show2.tikiwiki.org/tiki-index.php (Last update from SVN (21.0svn): Tuesday January 14, 2020 13:40:19 GMT-0000 - REV 75236)

I commented out remote shared CSS on this site and it is the same and I don't see anything else in the https://dev.tiki.org/tiki-admin.php?page=look which could possibly cause this.

Jean-Marc reported the code plugin icon on the toolbars here also doesn't work, presumably a similar issue...

Purrfect! Thanks Jonny!
