Description

While it is not wise to create or publish a slider with different height images it happen and the result is really naughty. See : [https://doc.tiki.org/PluginList-output-control-block#Report\\_Formatting](https://doc.tiki.org/PluginList-output-control-block#Report_Formatting)

As discussed in the January 2020 Tiki Roundtable Meeting it will be great to have a new optional parameter to fix the height no matter the usage (plugin in page or plugin list template).
