Description
I spot it on three branch 21 sites (themes.tiki.org, doc.tiki.org, and my localhost branch 21, but not in trunk): on tiki-admin_modules.php#content_admin_modules1-1, only "Edit" shows up in the action popup for each module. There's no "Move up", "Move down", or "Unassign".

Solution
Seems to have arrived with the latest bootstrap update increased the sanitisation on popovers (which we use for our menus still sadly) - am on the case...

Workaround
In the mean time, you can move modules around using drag and drop, and remove them by double clicking and using the remove button 🗑
