Related-to

-  Reordering of menu options not working

Description

At https://nextdev.tiki.org/tiki-admin_menu_options.php?menuId=47

I can't change the ordering of the menu options by *drag and drop*. They just stay at the original place after mouse up.

Moving them as sub options by moving them to the right also gives weird results. They do move but not at the appropriate place.

Solution

Hopefully d1dca9ff

Workaround

Edit menu items and change the "Position:" field by hand. This works and allows reordering.
