Description

Has anyone written a module to integrate PayPal's ecommerce capabilities into TikiWiki?

Should be done through a module and several plugins (ADD_TO_CART, SHOWCARTCONTENTS, CHECKOUT etc)...

Oh, on that one, I would love to have a plugin that invalidates the cache to make sure that inside a cached website there are pages that are always rendered fresh...

It would be really sweet:

Using Paypal subscriptions, people who have paid are placed in a group. And removed when their subscription has expired.
