Description

From within a shell script I run:

```
php ../html/console.php files:batchupload 5 subdirToSubgal createSubgals --confirm
```

It work fine (subdir are created and file imported accordingly).

However I got a bunch of notices. (I guess one for each file)

```
PHP Notice: Undefined variable: useCache in /var/www/virtual/elyseavenue-
paris15.fr/html/lib/filegals/filegallib.php on line 1313 PHP Notice: Undefined variable: useCache
in /var/www/virtual/elyseavenue-paris15.fr/html/lib/filegals/filegallib.php on line 1317 PHP
