### Description

doing some quick tests with tiki 21.x, I just noticed that geolocated tracker items are not shown in map any more in Profile GeoCMS Maps since 21.x

They still show fine in 20.x svn as of today

Some extra tweak is needed in the profile for the feature to work in 21.x? some regression?

hth

Reproduced here:

<http://xavi-9794-7275.show2.tikiwiki.org/tiki-index.php?page=Map-of-Tracker-items>

u: admin

p: 12345

(using trunk, since 21.x is not available in the dropdown to reproduce in show2.t.o)

index rebuilt already

See for instance this tracker item which is geolocated,

[http://xavi-9794-7275.show2.tikiwiki.org/tiki-view\\_tracker\\_item.php?itemId=1&from=Map-of-Tracker-items](http://xavi-9794-7275.show2.tikiwiki.org/tiki-view_tracker_item.php?itemId=1&from=Map-of-Tracker-items)

and all of them are displayed as usual when applying this "GeoCMS Maps 18" profile in previous tiki versions.

---

Still present this issue with trunk updated by git as of today

#### Solution

Hopefully fixed in 22.x in e0656138 ?

---

Still present in updated show2.t.o instance as of today (still using svn , btw, on the new contabo ssd-boosted server)

You can see that here:

<http://xavi-9794-7275.show2.tikiwiki.org/tiki-index.php?page=Map-of-Tracker-items>

(even after clearing tiki caches and reindexing the tiki; btw, running php7.4 there nowadays, in case it matters)
