### Description

Trying to understand what is going on with files and Tiki21 (most image show a .jpg icon instead of the image in the file gallery) I found out that I have way to much files in my file folder than my file gallery.

For 53 files in Tiki I have 204 files in my directory.

I understand there is an option to have more than one file per file (previous version) but I never had such quantity of extra files.

I see a parameter at : tiki-admin.php?page=fgal

"Allow download limit per file"

It is not set by default and when setting it the user have no idea of the limit that he can set.

1. I should be able to set "here" the threshold for the limit See my comment
2. I don't think this is the expected default behaviour and it can lead to serious inflation of the file folder (especially for new users without a lot of experience in IT).
3. Now that it's all here and after I set my limit to allow 1 file per download (1 file in my directory for 1 file in Tiki gallery) how to clean the extra files that are still there ?

## Solution

Not solved but clarified here :

<https://dev.tiki.org/item7286-New-parameter-to-set-by-default-for-all-new-gallery-the-maximum-of-version-archive-per-file>
