-  Exit from an update item modal in the plugin List goes to undefined page instead of staying in the page

On Tiki 21.
To reproduce, go at : <https://next.tiki.org/tracker22>
Edit an item from the actions (wrench) menu on the right of the table.

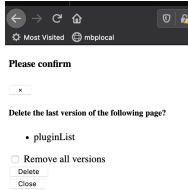

The design is broken.

Tested on one of my Tikis from a plugin list, on save it also goes to the page "undefined" instead of staying on the page (refresh ?) (I tried updating a value and without updating a value)
<https://share.vidyard.com/watch/XivK6CHsiD5MKVxLdnFX76?>

Works on Tiki 20 with the same database and it works as previously:
<https://secure.vidyard.com/organizations/230727/players/4Xs7Tyhok7peWDZUFLB8uv>

Same if I want to delete an item from the wiki pages (tiki-listpages.php):

But erasing it from the page itself work.

Thank you.

There is still an issue, split and clarified here :
