Description
I have a pluginList that produce a listing.
I need to print this listing and to print only the data, the table I use "d-print-none" class on the customSearch template, and other buttons bar (custom and Tiki).

I use a small jq script and a nice button

```jq
$('.print-button').on('click', function() {
    window.print();
    return false;
});
```

```html
<a href="#icon-print" class="print-button m-1"><i class="fas fa-print"></i></a>
```
It work fine on Firefox but not on Chrome and Safari.

May not directly related to Tiki... but it used to work.

Solution
Can’t say but it is working again...
