Description

I have a pluginList that produce a listing.

I need to print this listing and to print only the data, the table I use "d-print-none" class on the customSearch template, and other buttons bar (custom and Tiki).

I use a small jq script and a nice button

```
jq
```

```
{jq} $(' .print-button').on('click', function() { window.print(); return false; }); {/jq}
```

```
html
```

```
<a href="#icon-print" class="print-button m-1"><i class="fas fa-print"></i> </a>
```

It work fine on Firefox but not on Chrome and Safari.

May not directly related to Tiki... but it used to work.

Solution

Can't say but it is working again...
