### Description

Share feature was enabled. Unified search index rebuilt (or at least intended to do so, through tiki control panel)

I attempted to share one page with myself to double check a report with Share feature when perspectives were used, and I saw that it seems to be a broken feature in t.o for unknown reasons.

Example:

[https://tiki.org/tiki-share.php?url=%2F202002-TAG-Meeting%3Fpage\\_ref\\_id%3D1328](https://tiki.org/tiki-share.php?url=%2F202002-TAG-Meeting%3Fpage_ref_id%3D1328)

I typed one or several emails, selected the options

- "Share access rights"
- "Receive notifications when the link is accessed"

and set

- Token Access Limit: 5

Send email: yes

(all other action buttons set to "no"), and I get at the top: "undefined"

No email is received by recipients.

t.o seems to currently run on:
