Description
The Calendar of 18.5 does not support repeating events with NO final date. Not only relevant for birthdays, but also for commemorative events. And I have tested to enter 0 as number of repetitions, that doesn't work.
Thanks
hman

Calendar doesn't do repetitions at all... Created a test event to be repeated on every Sunday, shows up only once. Checked the event, yes , it is still stored as weekly repetition, the repetition just isn't executed.

hman 16 Feb 21 21:17 GMT-0000

I now know why calendar does not support endless repetition, but the reason ain't nice: Because it would explode everyones (!) database...! I had a look into my Tiki's DB and found that with just ten repeated events (because of the lack of endless repetition set to 99 repetitions) I have a thousand entries in the calendar table, so if calendar would support endless repetions, it would shatter the boundaries of every DB on the planet... That is not a good concept, to say the least.
