I think @Victor Emanouilov just fixed this recently in <http://sourceforge.net/p/tikiwiki/code/76666>

Seems ok, I close hoping this is final. ;-)

Either the fix hasn't been applied yet or it doesn't fix the issue. I also recurringly cannot edit bug reports or rather: edits are lost. I thought this might have something to do with the errors that Javascript cannot be detected, that I get sometimes (and only on dev.tiki.org). Also it only affects editing bug reports. I can edit my comments with no problems...

I've reopened the bug report after your comment, hman, thanks for reporting.
