Description

In lib/prefs/permission.php is a help text that resists all trials to translate it. It does get pumped through tra(), but I cannot translate it even if I copy exactly the string from the PHP source code. I have also tried to substitute the line break that is contained by \n, the newline character. To no avail.

The code in question is this:

```
function prefs_permission_list() { return [ 'permission_denied_url' => [ 'name' => tra('Send to URL'), 'description' => tra('URL to redirect to on "permission denied"'), 'type' => 'text', 'size' => '50', 'default' => '', 'tags' => ['basic'], ], 'permission_denied_login_box' => [ 'name' => tra('On permission denied, display login module'), 'description' => tra('If an anonymous visitor attempts to access a page for which permission is not granted, Tiki will automatically display the Log-in module. Alternatively, use the Send to URL field to display a specific page (relative to your Tiki installation) instead.'), 'type' => 'flag', 'default' => 'n', 'tags' => ['basic'], ], ]; }
```

The string in 'description' cannot be translated. And when I grep through the entirety of Tiki 18.6, in no language has anyone managed to translate this part, because in all of the 58 languages that are available in /lang, not a single one custom.php or language.php contains a string starting with "If an anonymous visitor"...

Untranslateable is also site.php. Look at this weird string with spaces, tabs (!) and line breaks in the middle... You cannot translate this, even if you copy that string into custom.php and replace the quote characters with \" it won't translate because tra() can't find it.

```
return [ 'site_closed' => [ 'name' => tra('Close site'), 'description' => tra('Use this setting to "close"
the Tiki site (such as for maintenance). Users attempting to access the site will see only a log-in form.
Only users with specific permission will be allowed to log in. Use the Message to display to specify
the message that visitors will see when attempting to access your site. '), 'type' => 'flag', 'help' =>
'Site-Access#Close_site', 'perspective' => false, 'tags' => ['basic'], 'default' => 'n', ],
```
