Module user list: confusing module parameter description

Sometimes I am really at a loss when I want to translate Tiki Wiki, because I really do not understand the English original. For instance, there is a module "user list". The module itself is plain and straightforward, and does what the name implies, but as the saying goes "the devil is in the details.". There is a parameter under the tab "module" named "included groups". Shouldn't be that hard to guess what it could do. But what is the user supposed to fill in? The explanation is this:

"Show only the users of the group group and of a group including group."

Ahem? What was the artists intention with this sentence? 😐

You'll find it on line 81 of /modules/mod-func-users_list.php.
