Delete unused images needs "are you sure?" dialog

On the wiki control panel is a button that links to /tiki-admin.php?page=wiki&rmvunusedpic=1.

This button fires without warning, IMHO a "Are you sure?" dialog is really necessary, because you do not know, and are not informed of, what you delete here. Possibly some images you just forgot to use somewhere, or that users just recently uploaded and had not time to use. In the case of user images the risk is imminent, that no backup exists, which will lead to loss of data!

The dialog should include a list of images to be deleted, ideally with the option to opt out certain images (checkboxes for each, including "select all" and "unselect all" buttons.)
