Description
The class 'opaque calBox' from the calendar is broken. It is supposed to show the details of a calendar event, instead it shows raw Tiki syntax, in the case of a test event from admin on my site it is this that gets presented as text (!) to all users:

```
<div class='opaque calBox' style="width:200px"><a href="tiki-calendar_edit_item.php?viewcalitemId=323" title="Details">Testevent #3</a><p class="text-muted"><strong>Erstellt von:admin</strong></p><br></div>
```
