Areas: There is no delete mechanism

When you define workspace areas, there is no mechanism to delete them. They can be edited, but not deleted.

Please demonstrate your bug on show2.tikiwiki.org

Just found a way, but its not in management. When you list them, you get a wrench icon, and that contains delete. So it is possible, just hidden (rather effective 😅)

Uh-oh, the delete was not executed. It is still there after a refresh and another visit to the control panels/workspace.

Also, there is no way to delete a workspace template...
