Description

Database error on <https://tiki.org/tiki-print.php?page=Community&display=pdf>

Seem the auth token isn't getting generated maybe?

I tried to update mPDF there via admin/packages and it said it failed because:

Problem 1

```
- Conclusion: don't install mpdf/mpdf v8.0.7
- Conclusion: don't install mpdf/mpdf v8.0.6
- Conclusion: don't install mpdf/mpdf v8.0.5
- Conclusion: don't install mpdf/mpdf v8.0.4
- Conclusion: don't install mpdf/mpdf v8.0.3
- Conclusion: don't install mpdf/mpdf v8.0.2
- Conclusion: don't install mpdf/mpdf v8.0.1
- Conclusion: don't install mpdf/mpdf v8.0.0
- Conclusion: don't install mpdf/mpdf v8.0.7
- Conclusion: don't install mpdf/mpdf v8.0.6
- Conclusion: don't install mpdf/mpdf v8.0.5
- Conclusion: don't install mpdf/mpdf v8.0.4
- Conclusion: don't install mpdf/mpdf v8.0.3
- Conclusion: don't install mpdf/mpdf v8.0.2
- Conclusion: don't install mpdf/mpdf v8.0.1
- Installation request for mpdf/mpdf ^8.0.0 -> satisfiable by mpdf/mpdf[v8.0.0,
v8.0.1, v8.0.2, v8.0.3, v8.0.4, v8.0.5, v8.0.6, v8.0.7].
- Conclusion: remove setasign/fpdi 1.6.2
- mpdf/mpdf v8.0.0 requires setasign/fpdi ^2.1 -> satisfiable by

Comments

Oliver Hertel 24 Sep 20 19:03 GMT-0000

```
> php temp/composer.phar require --update-no-dev --prefer-dist  
setasign/fpdi^v2.3.3
```

```
[InvalidArgumentException]
```

```
Could not find a matching version of package setasign/fpdi^v2.3.3. Check  
the package spelling, your version constraint and that the package is  
available in a stability which matches your minimum-stability (stable).
```

Maybe we should have the dependencies available too, then the installation might succeed?

Jonny Bradley 25 Sep 20 12:08 GMT-0000

Hi Oliver, thanks for checking...

I just set up a new tiki 22 here and installed mPDF and it seemed to work fine, so there must be some other dependency that fpdi (whatever that is) doesn't like. My output on admin/packages came out like this:

= New composer.json file content:

```
{
  "name": "tiki/tiki-custom",
  "description": "Tiki Wiki CMS Groupware",
  "license": "LGPL-2.1",
  "homepage": "https://tiki.org",
  "minimum-stability": "stable",
  "require": {
    "fzaninotto/faker": "dev-master",
    "npm-asset/lozad": "^1.6.0",
    "mpdf/mpdf": "^8.0.0"
  },
  "config": {
    "process-timeout": 5000,
    "bin-dir": "bin",
    "component-dir": "vendor/components"
  },
  "repositories": [
    {
      "type": "composer",
      "url": "https://composer.tiki.org"
    }
  ]
}
```

= Composer execution output:

Errors:

Loading composer repositories with package information

Updating dependencies

Package operations: 5 installs, 0 updates, 0 removals

- Installing setasign/fpdi (v2.3.4): Downloading (100%)
- Installing psr/log (1.1.3): Downloading (100%)
- Installing paragonie/random_compat (v9.99.99):

Downloading (100%)

- Installing myclabs/deep-copy (1.10.1): Downloading (100%)

- Installing mpdf/mpdf (v8.0.7): Downloading (100%)

Writing lock file

Generating autoload files

(not sure that helps, just making a note of it here ;)

Oliver Hertel 26 Sep 20 05:56 GMT-0000

Ok, instead of updating I removed and reinstalled mpdf, that worked, so the update process is maybe broken.

Now we got a database error:

System error.

The following error message was returned:

You have an error in your SQL syntax; check the manual that corresponds to your MySQL server version for the right syntax to use near 'groups, email, createUser, userPrefix) VALUES('120', '10', '10', '/tiki-print.' at line 1

The query was:

```
INSERT INTO tiki_auth_tokens ( timeout,
maxhits, hits, entry, parameters, groups,
email, createUser, userPrefix ) VALUES( ?, ?,
?, ?, ?, ?, ?, ? )
```

Values:

```
120
10
10
/tiki-print.php
{"page":"HomePage"}
["Admins","Registered","Team Admins","Team
Developers","Team Infrastructure","Team
Security","TUG_GermanLanguage","TwoEditors","An
onymous","Team Legal"]
n
```

The built query was likely:

```
INSERT INTO tiki_auth_tokens ( timeout,
maxhits, hits, entry, parameters, groups,
email, createUser, userPrefix ) VALUES( '120',
'10', '10', '/tiki-print.php',
'{"page\":"HomePage\"}',
'["Admins\","Registered\","Team
Admins\","Team Developers\","Team
Infrastructure\","Team
Security\","TUG_GermanLanguage\","TwoEditors\
","Anonymous\","Team Legal\"]', '', 'n', '' )
```

Thanks for fixing and checking Oliver - yes, that's the SQL error i was getting the other day, and i can't work out what's wrong with the query (tried it locally and it executed fine - also the schema for that table seems

all correct).

Anything in the MySQL logs?

Marc Laporte 24 Jan 21 04:08

GMT-0000

That was related to MySQL 8.0
