Description

I create a tracker with a *Files* field

If the option of the field *Upload In Modal* is *No*, it is impossible to upload a file.

The message I get is:

194x258_Marc Laporte.jpeg (Potential cross-site request forgery (CSRF) detected. Operation blocked. Reloading the page may help.)

Reloading makes no difference.

I tried in 18.x also and I got no error message but I got the "Loading" turning circle forever, which is a bit different but it does not allow uploading either 😞

Added oddity I saw while setting up the show instance

If the *Files* tracker field is not given a "Gallery ID" value, the pluginTracker actually allows uploading a file but the tracker admin section "Create item" still fails. That is not helpful because storing all files in the root file gallery is evil, just vVery puzzling.
