Description

Between friday (when you, mose told me how to use intertiki) and today, I've lost information of intertiki, regarding the master tiki site.

I have had to deactivate intertiki through phpmayadmin, since I couldn't login as admin on edu.tw.o (I had the same name in tikiwiki.org - as plain user) and in edu.tw.o (as admin).

and I couldn't login on edu.tw.o (with or without realm).

Solution

change tik_preferences value field type.

Priority
