Description

Version 2.1 & 2.2

modules/mod-calendar_new.php displays strange month view when selecting LIST VIEW from tiki-calendar.php. The date (numerical) is placed several days backward in regards to day of the week (Monday - Sunday).

Screenshot (sorry so large for clarity):

This issue appears to be with the month view in mod-calendar_new.php assigned to variable \$calendarViewMode. When I select \$calendarViewMode='week' this issue does not arise.

I duplicated the function below in lib/calendar/calendarlib.php:

```
if ( $_SESSION['CalendarViewList'] == 'list' ) { if ( is_array($listtikievents) ) { foreach ( $listtikievents as $le ) { if ( is_array($le) ) { foreach ( $le as $e ) { $listevents[] = $e; } } } } }
```

I modified it to say:

```
if ( $_SESSION['CalendarViewList'] == 'calendar' ) { if ( is_array($listtikievents) ) { foreach (
$listtikievents as $le ) { if ( is_array($le) ) { foreach ( $le as $e ) { $listevents[] = $e; } } } } }
```

This caused it to be "fixed" but it broke in Internet Explorer by showing a full semester view in the calendar. Not so desirable effects. We've since switched to the week view in the mod-calendar_new.php module with no issues.

I've found the same problem when using Calendar view which is "one day out" and when I switch to list view it goes "two days out". I posted some more details at the Features/Useability Forum at http://tikiwiki.org/tiki-view_forum_thread.php?comments_parentId=32040&topics_sort_mode=lastPost_desc&forumId=4
