Description

The database of dev.tikiwiki.org is b0rked - it has utf-8 characters in a latin1 database, which messes stuff up. I have no idea when this happened, but it is likely that afterwards new bugs have been reported that include special characters and work correctly. It is virtually impossible to fix that afterwards. But before migrating to a new host, we wanna test that. so lets write some Umlauts and see how they get displayed after saving the bug:

Ã¸,Ã¸-Ã¸œ Ã¸Ã¸Ã¸¼ Ã¸©Ã¸Ã¸

(luci edited and saved)

Solution
