Description
Freshly installed TikIWiki 3.0 beta 4 with the Company Intranet Profile.

Created a tiki sheet (either as admin or as a registered user, this happens in both cases).

Tried to insert a column.... it begins and then suddenly takes me to a new sheet labeled:

ERROR:

A SheetId is required.

--
- THIS HAPPENS ON SAFARI 3.2 (macOS)
- This behavior does not occur under Firefox 3

Solution
Workaround is to use Firefox.

Priority
25
