Subject

mobile doesn't recognize theme style in Look & Feel admin panel.

Version

12.x

Category

- Usability
- Conflict of two features (each works well independently)

Feature

Mobile (Mobile Tiki and Voice Tiki)
Theme: Look & feel, Styles, CSS, Theme Control Center
Admin Interface (UI)

Resolution status

Description

Using mobile mode, from a PC with Chrome (on GNU/Linux, in case it matters).

I clicked on "Switch to mobile site" in nextdev.tiki.org, and then when you go to "Admin home > Look & Feel", the theme style shown there is "abse" and not fivealive, so that if you save any setting there in L&F, you are switching the theme for the non-mobile mode (and you will not notice since you as admin are still in mobile mode).

Doesn't mobile mode use perspectives? Therefore if you save settings it should not affect teh default perspective that is the PC version.

Not sure but thought this was the behaviour, anyone else have comments on this?

Xavier de Pedro 28 Oct 13 12:12 GMT-0000

no idea, in fact, sorry.
