Description

As an example, here is a Merge Request (MR): https://gitlab.com/tikiwiki/tiki/merge_requests/53

When it arrived in Tiki SVN:

<https://sourceforge.net/p/tikiwiki/code/69454>

As you see, a lot of important context is missing. Could we automate adding of the MR URL?

Presumably tweak the code here?

<https://gitlab.com/tikiwiki/systools>
