GlitchTip

What

https://gitlab.com/glitchtip support was added to Tiki23 via
https://gitlab.com/tikiwiki/tiki/-/merge_requests/825

Why

To help community members (users, testers, sysadmins and developers track errors and have relevant information, which will make it easier to fix them

Who

- Ricardo and Jorge (Xorti)
- Fabio
- Marc

How

- Add https://glitchtip.com/sdkdocs/php to Tiki

Ideas

db/local.php can be used to store keys (if prefs are not loaded yet)

Questions

- How to trigger an alert for slow pages? (ex.: more than 10 seconds to load)

GlitchTip benefits

- GlitchTip is FLOSS SaaS, so you can self-host, or subscribe to a service. We'll make it easy for Tiki community members to leverage this!

Related

- Debugging tools deployable within Tiki
