- https://github.com/jeromeetienne/virtualjoystick.js
- https://github.com/marcbourlon/TipTap
- Slideshow like http://tiki.org/Presentation-Tiki-Suite-LibrePlanet-2014 would be great in touch mode (to slide to next slide)
- http://interactjs.io/

Revamp is coming

- Pascal St-Jean & Jonny
- https://www.ohloh.net/p/kurogo New LGPL lib...
- Bootstrap

Tiki9 issues

- random URL issue (affects 9.x and 10.x)
- jQueryUI vs Mobile
  - Visit Tiki10 in mobile mode and try to edit the spreadsheet: "Required features: feature_jquery_ui. If you do not have the privileges to activate these features, ask the site administrator." If jQueryUI is required for mobile, then the edit button shouldn't be there. (Go to regular mode to edit this spreadsheet).
  - Same thing for when you visit tiki-admin_modules.php in mobile mode.
- http://dev.tiki.org/tiki-print.php?page=Tiki9&display=pdf is a blank page in mobile mode. We could just turn off print for this perspective, but mobile phones can read PDF nowadays...

Tiki7

- Tiki Mobile with HAWHAW was first released in 2004 and it was impressive for the time. Nowadays, phones are much more powerful and now that Tiki6 LTS is done, it's now time to make major changes. Thus, we are moving to jQueryMobile. MobileESP will handle device detection.
- This will also involve changes to the Print version Fullscreen and HTML5. And for making apps, we'll
use Apache Callback

- http://jquerymobile.com/strategy/
- http://code.google.com/p/mobileesp/
- http://mobiledetect.net/
  - Luca Passani, author and lead of the WURFL project, has provided an exemption to Zend Framework to provide a non-GPL adapter accessing the WURFL PHP API.
