Pre-dogfood servers for Tiki 24 release process

2021-07-29: https://dev.tiki.org, https://doc.tiki.org, and https://themes.tiki.org are now happily running Tiki23, so this page has been adjusted and renamed so the pre-dogfood servers run trunk, which is the future Tiki24.

Why
We want pre-dogfood servers to help testing and make the release process smoother.

Details
Index should be rebuilt as part of the process
