Tiki 5.1 release process is late again. The idea was to release during TikiFestBarcelona2.

Schedule

Blockers

Important To-Do

- Issue with '{tr}...{/tr}' (instead of "{tr}...{/tr}"), which is breaking again the help box and plugin descriptions, etc. in Catalan in recent tiki5svn (Xavi)
  See the thread about it in the tikiwiki-devel list.
- Colorbox popup for wiki images doesn't recognize viewport size.
- Remove/replace old logos from img/tiki/

Other To-Do

- tiki-install.php has a broken image styles/fivealive/options/blueberry/header.png (when not logged in). Should use same layout as the rest of the installer
- Tiki logo is not positioned nicely on a fresh install (not enough padding). Click through various *.tiki.org sites to see that there is a small consistency issue.
- Metrics, Ratings and BigBlueButton deployment
- replace all uses of img/tiki/tikibutton2.png by a new badge img/tiki/tikibadge.png ->
  http://branding.tiki.org/Badge
- ...

Issues

- Fatal error: Call to a member function fetchAll() on a non-object in installer/tiki-installer.php on line 1021 if you enter an incorrect DB name on 1st install

Nice To Have

- Finish all Preferences (Pkdille, help needed)
- 30 minutes fixes
- Tiki4 leftovers

See Roadmap
Documentation

Documentation for the end user of the changes and improvements included with this new release:
http://doc.tiki.org/Tiki5

- Release Notes 5.1

Roles

For a list what is expected, please see Release Roles and put your name below. Ideally at least 2 people per role.

- Release coordinator: ...
- Developer(s):
  - jonnyb
- Packaging:
  - ...
- Security:
- Wishlist & testing:
  - ...
- Documentation:
