Update from SVN pre 2013

On 2012-12-12, Tiki source code management moved to the new platform offered by SourceForge.net. This is a good long term move by SourceForge.net. However, the URLs for SVN have changed, and thus there is an extra step to get back to the usual ease of updating via SVN, if your original checkout was made before that date.

How to know if I have a checkout from the pre-2013 repository?

From a shell prompt, run 'svn info'.

If the URL includes ‘tikiwiki.svn.sourceforge.net', you need to 'relocate' before updating your tiki.

<table>
<thead>
<tr>
<th>result of 'svn info' showing incorrect repository</th>
</tr>
</thead>
<tbody>
<tr>
<td>URL: <a href="https://tikiwiki.svn.sourceforge.net/svnroot/tikiwiki/branches/9.x">https://tikiwiki.svn.sourceforge.net/svnroot/tikiwiki/branches/9.x</a></td>
</tr>
</tbody>
</table>

If the URL includes 'svn.code.sf.net', then you are using the current repository and you may use the update commands.

<table>
<thead>
<tr>
<th>result of 'svn info' showing correct repository</th>
</tr>
</thead>
<tbody>
<tr>
<td>URL: <a href="https://svn.code.sf.net/p/tikiwiki/code/branches/9.x">https://svn.code.sf.net/p/tikiwiki/code/branches/9.x</a></td>
</tr>
</tbody>
</table>

If you are not using the current repository and attempt to use an update command, you will receive one of the following messages:

```
# svn up -r 44179
svn: Could not open the requested SVN filesystem
#
```

```
# svn up
svn: Repository moved permanently to 'https://svn.code.sf.net/p/tikiwiki/code/branches/proposals/6.x'; please relocate
```

Example commands to relocate to the new repository

Pick the command according to your version.

<table>
<thead>
<tr>
<th>relocate trunk</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>relocate 10.x</th>
</tr>
</thead>
</table>
relocate 9.x

```
```

relocate 6.x

```
```

From an old 6.x proposals to the new 6.x

First change from the old to new SourceForge repo

relocate 6.x proposals

```
```

Then, move from proposals/6.x to 6.x

```
switch to 6.x

svn switch https://svn.code.sf.net/p/tikiwiki/code/branches/6.x .
```

**Once you have relocated, you can use the regular Update commands.**
