

# File Gallery

Related: [Binary File Handling](#), [WebDAV](#), [File Gallery Revamp](#)

## Feedback for Tiki7 Use file galleries for wiki attachments

~~r35073: bug: if you upload a file to a wiki page, the file gallery is created but the file is not uploaded to this newly created gallery fixed for 7.1~~

### Bug

- Page names with a comma (') will prevent file uploads. Ex.:  
<http://demo.tiki.org/7x/tiki-index.php?page=test123%2Cvirgule>

### Problem

- [r14162](#) is reported to introduce the following issue:
  - quiet upload failures (which happen when PHP doesn't allow a sufficient uploaded file size, POST size, memory limit, or with an insufficient MySQL packet size limit). When the upload fails, the error is displayed in a hidden iframe, and the page keeps showing "Uploading file...".

### Architecture

- File gallery names are chopped off at 80 characters, but wiki pages are sometimes longer
- What happens if page is renamed or deleted?
  - File Gallery is not deleted and there is no way to manually delete ex.: `tiki-list_file_gallery.php?galleryId=272` has no delete button and since it's not browseable like most file galleries, I can't delete from parent view
- Once you activate, existing attachments are no longer available
  - yet, they are still in `tiki-admin.php?page=wikiatt`
- There should be a way (beyond WebDAV) to navigate all file galleries that are linked to wiki pages
  - It would be nice to have an optional column here: `tiki-listpages.php`
- There is no script to move data back and forth from `wiki_attach` to `file_gal`?
- It creates a file gallery for each page (even if it doesn't yet have a file attached) and thus, since your last visit grows.
- Archives are working at `tiki-list_file_gallery.php?galleryId=6` but not on the wiki page
  - Workaround is to not use archives

### UI to improve

- All operations (Replace, edit properties, etc) should send you back to the wiki page after.
- wiki attachments in File Gallery: search result link doesn't link to wiki page?
  - Can be fixed more easily with improvements in Tiki8

# to test

- Watch : does it work for file gallery attached to wiki page?
- Search in Files : test with Lucene (expected to be OK)
- Check if perms are OK

# Open

# Making Image galleries obsolete

Please indicate below what is needed to make [Image Galleries](#) obsolete. (and thus they can be removed because everyone will be using file galleries).

1. A data migration script.
  - See Robert Plummer, who has a basic script
2. Redirect scripts so old URLs work
3. Features/characteristics that image galleries have that file galleries don't:
  - Separate thumbnail files are created
  - Can set size of thumbnails and regenerate
  - PNG images don't seem to lose transparency like they do with file galleries
  - Can scale images (although this has never worked for me)
  - Can browse full size images with one image per page with related info
  - Can sort thumbnail view by name, date, hits, user, size

## Alias

- [File Galleries](#)
- [DMS](#)
- [Document Management System](#)
- [File Manager](#)
