

GlitchTip

What

<https://gitlab.com/glitchtip> support was added to [Tiki23](#) via and we are now [Using GlitchTip as part of the Tiki development process](#)

Why

To help community members (users, testers, sysadmins and developers) track errors and have relevant information, which will make it easier to fix them

Who

- Ricardo and Jorge (Xorti)
- Fabio
- Marc

How

- Add [GlitchTip](#) to Tiki

Ideas

- `db/local.php` can be used to store keys (if prefs are not loaded yet)

GlitchTip benefits

- GlitchTip is [FLOSS SaaS](#), so you can self-host, or subscribe to a service. We'll make it easy for Tiki community members to leverage this!
