

How to comment your code

Code commenting

Help other developers to understand what your code is doing by commenting in the source files.

PHP comments

Single line comments

Single line v1

```
/** This is a single line PHP comment */
```

Single line v2

```
//This is also a single line PHP comment
```

Multiline comments

Multiline

```
/**  
 * Description of what the function is supposed to do with multiline commenting. Place it  
 before the code  
 * @param [Type] [name] [<description>]  
 * @return [Type] [<description>]  
 */
```

Sample

```
/**  
 * Minify multiple js files into one single file.  
 * @param $files array of file paths  
 * @param $external array ref to put unminifyable files into. i.e acts as return value  
 * @return string path of minified js file  
 */  
private function minifyJSFiles($files, & $external)  
{  
}
```
