

Optical character recognition

Optical character recognition was added to [Tiki20](#) and will be improved massively in [Tiki21](#) via this [wrapper to work with Tesseract OCR inside PHP](#).

See also: <http://we-love-php.blogspot.ca/2013/01/make-pdfs-searchable.html> -> cool but not planned. The OCR gathered-data will live in the Tiki database.

<https://en.wikipedia.org/wiki/DjVu> -> Could be an interesting format

alias

- [OCR](#)
