

Share

This page is to discuss, improve, and likely streamline (merge?) all share ("push"-type) functionality in Tiki. [Watch](#) this is a pull mechanism and will likely stay independent.

Why a new "Share" feature

- Every user can authorize the site with oauth for twitter/facebook so they need not to log in to each of the sites to push a message out on these channels.
- Instead of having a man in the middle doing the service for us (and the statistics/tracking), we can do it here
