

# Staging and Approval

## Flagged Revisions

For the documentation, see [Flagged Revisions](#) & [Wiki Argument Variables](#)

## ISO9001

Improvements needed to facilitate the use of Tiki for the ISO9001 quality protocol.

See also profile [ISO9001](#) and [wish5112](#)

See: [https://tiki.org/tiki-view\\_forum\\_thread.php?forumId=3&comments\\_parentId=54311](https://tiki.org/tiki-view_forum_thread.php?forumId=3&comments_parentId=54311)

New wiki argument variables added in trunk (for Tiki14):

- currentVersion
- currentVersionApprover
- currentVersionApproval
- currentVersionApproved

See: [r53372](#), [r53373](#)

## Tiki9 Flagged Revisions

Flagged revisions could use a little TLC. See <http://doc.tiki.org/Flagged+Revisions#FAQ> Here are some notes that are hoped to make that TLC easier for a newb.

### 1. How are they implemented in the database?

See the Database references table below. When you approve a Flagged Revision, a record is appended in tiki\_objects\_attributes, with itemId=tiki\_history.historyId, type="wiki history", attribute="tiki.history.moderation", and value="OK". Then follow table.fields tiki\_objects\_attributes. itemId => tiki\_history.historyId => tiki\_history.pageName and tiki\_history.version, which are two fields which match those in table tiki\_pages.

### 2. There is no way to list all current pending Flagged Revisions.

1. A simple way to implement that might be to modify tiki-listpages.php by adding another Filter, very similar and following the tiki-listpages.php and tikilib.php code paths of "exact\_match", selectable by a checkbox, labeled something like "Flagged Revisions pending approval". See tikilib.php function list\_pages(). Need to define \$mid = "where" clause, and "elseif (\$type == 'flaggedrev\_pending')".
