

Tiki 12 Composer Dependencies

Working off <https://www.versioneye.com/user/projects/52928967632bac1674000101> as a baseline, I have created a table below to keep track of each dependency and state.

Notes: more info:

<https://www.versioneye.com/user/projects/530909c2ec1375065e000296> (BUT seem not to work reliably)

Minor release deciding factor:

- Security fixes only is mandatory to update
- Other updates are to be made only if very certain it is not going to cause any problems
