

Tiki Profiles Tester

Executive Summary

Tiki Profiles Tester is a tool to automate the testing of [Tiki Profiles](#) for various Tiki versions. And thus, it helps the Tiki community detect issues, like [Smoke testing](#).

Status

As of 2021-10-16, this is in alpha. Please expect some refinements in coming weeks.

How to see in action

- ~~It runs~~ it is planned that it will run once per week
- It catches profile validation errors and adds them as information on this dashboard:
<https://tikiwiki-ci.gitlab.io/tiki-profiles-tester/>

Thank yous

- Thank you xavidp for the original idea and code: <https://github.com/xavidp/TikiProfilesTester> (a [sample report](#))
- Thank you xorti for the modern and future-proof implementation
- Thank you GitLab for letting us use free CPU:
<https://gitlab.com/tikiwiki-ci/tiki-profiles-tester/-/blob/master/.gitlab-ci.yml>

Code

<https://gitlab.com/tikiwiki-ci/tiki-profiles-tester>

How and where to report bugs

Not yet. As of 2021-10-16, we already know of things to do. When we finish that, we'll open up for suggestions

Questions

- What should be domain name for <https://tikiwiki-ci.gitlab.io/tiki-profiles-tester/>?
 - profiles-tester.tiki.org ?
 - tiki-profiles-tester.tiki.org ?
 - something else?

Ideas for the future

- Run for each commit, as part of the CI
- Run other tests like [TikiTests](#)
- Visit wiki pages like the ones generated by http://profiles.tiki.org/Test_All_Plugins
- Have a way to test a specific branch / merge request (will save time from developers who are reviewing merge requests)

- [System Features](#)
- Alert specific people of errors
