

jQuery

Related: [AJAX](#), [Mootools](#), [No javascript](#)

jQuery was added as an experimental feature of [Tiki3](#) and became the default (always on) in [Tiki4](#). In [Tiki5](#) some work is being done to add jquery.sheet interface to the Tiki Spreadsheets. (<http://jqueryplugins.weebly.com/jquerysheet.html>)

Tiki will have more & more JavaScript usage to improve user experience.

We use quite several jQuery libs:

http://tikiwiki.svn.sourceforge.net/viewvc/tikiwiki/third_party/jquery/

Presentation video:

<http://blip.tv/file/1804195>

The first integration was done in [ExperimentalBranchesjQuery](#)

[Decision thread about using jQuery](#)

Bugs

Feature requests

- Improve integration of JQS5
 - Images should resize
