

## Screencast

[Kaltura](#), [Video](#), [Video annotations](#), [Video Editor](#), [Multimedia](#), [Screencast](#), [Slidecasting](#) and [BigBlueButton](#) should be re-organised.

This is now done via the integration of [jCapture](#) in Tiki. (which has been removed because it's a Java applet and we need an HTML5 alternative)

Use case: I want to record a [screencast](#) via my browser and make available on my Tiki-powered site. Ex.: report a bug, create some documentation, etc. This will be useful to embed images & videos in wiki pages and make Tiki more like [Wink](#), [a Tutorial](#) and [Presentation creation software](#) (very nice but not open source)

## Wishes

### Using Record RTC - Tiki23+

Basic desired features

- Select part of the screen
  - ~~Pick still image or video~~ done
  - ~~audio recording (yes/no)~~ --done
  - ~~webcam (yes/no)~~
- ~~Pause during recording~~ done
- ~~Replay before uploading~~ done
- Convert to ~~.SWF~~ done or .FLV (which can played by <http://code.google.com/p/flvplayer/>)
- Upload as a file to ~~Tiki~~ **done** or Kaltura
- Embedding as wiki syntax or in [WYSIWYG](#) (CKEditor)

Ideally

- ~~Be the same tool as for ScreenCapture (still images)~~ Done
- ~~Voice recording (but we can do this after with Popcorn Maker)~~ done
- Add basic annotations (but we can do this after with [Popcorn Maker](#))
  - During the video would really nice. Arrows, circle, text and scribbling (but we can do this after with [Popcorn Maker](#))
  - [Video annotations](#)
- Encode as WebM before uploading (to save bandwidth)
- Save as
  - Animated gif
  - ~~Flash~~ Done

- [Capture webcam](#)

- <http://www.ohloh.net/tags/screencast>
- <http://socialsourcecommons.org/tag/screencapture>
- <http://socialsourcecommons.org/tag/Screencasting>

Perhaps in the future, [BigBlueButton](#) (they already have an applet for desktop sharing) or [Kaltura](#) (this totally fits in their use case) will offer this, but until then...

This one has great feature set:

- [ScreenCastle](#) web screen capture, which uses [Skoffer](#) and even a [MediaWiki plugin](#) but it's not open source and you can't password-protect your recording. (free to use though)

Also:

Non-web browser options

FOSS

- <http://krut.sourceforge.net/>
- <http://code.google.com/p/zscreen/>
- [Spark](#) ( IM client which can take a screenshot)
- [SimpleScreenRecorder](#): <http://www.maartenbaert.be/simplescreenrecorder/>  
it has been used successfully to record 40+ videos uploaded to youtube about usage of Tiki. See: [TikiMovies](#)

## Not FOSS

- [Camtasia by TechSmith](#), specially on the Mac side.
- [FastStone Capture](#)
- [BB FlashBack Express](#)
- <http://www.debugmode.com/wink/>
- [JShot](#) is a multiplatform screen capture and uploader application which allows you to capture and annotate a part of your screen and share it via the Internet in one step. Free to use for personal usage.

## Last resort

If we can't find something FOSS & Web-based, we can look into using Jitsi (as part of [Tiki Suite](#)) (See also what is being done on the [blue.box](#) side)
