

# Token Access

<https://sourceforge.net/p/tikiwiki/code/HEAD/tree/trunk/lib/auth/tokens.php>

There are variable names which seem to need some adjusting

share\_can\_choose\_how\_much\_time\_access -> share\_can\_choose\_how\_many\_times\_access

how\_much\_time\_access -> how\_many\_times\_access

Related: [Share](#)

## How to extend beyond one URL?

- Images included in a page: needed for [wkhtmltopdf](#) PDF generation
- Files in a file gallery
- Tracker items in a tracker
- Items in a category listing
- etc.

Or make it easier to access multiple URL at once:

An idea: multi-item token access email: find a way to send an email with many links to access many pages and files. Ex.: Extend PluginList with checkboxes

## Ideas

- Could it be with http referrer? (so any images called from a page or any links in a page are OK)
- Super token with tiki\_p\_admin for wkhtmltopdf to get embedded images
