

## Image Gallery

### Status

We have a decent image gallery. It is possible to store images in Filesystem or in Database. Full galleries as well as individual images can be categorized. Content reuse through the rest of Tiki is very useful.

### Roadmap

However, the UI / front-end is not as nice as other photo album software. The slideshow feature needs a revamping. There is a medium/long term plan to have [File Galleries](#) supersede image galleries.
