

# All Patches

- Below is a list of all patches on this site. Patches are code snippets (which can be fairly elaborate) that fix, enhance or change the default behavior of Tiki. Once they are added to the main Tiki code base, the tracker setting should be changed to "pending" if it's in the code but not yet released or "closed" if it's the latest stable version of Tiki.
- If the code works for you, please add a comment to share your experience. If many people comment to indicate the code is useful and works well, it will increase the chance that a programmer will add the code to the main Tiki code base or in [mods](#). If you are a programmer, please see: [How to get commit access](#).
- To add items to the list below, please see: [How to Submit a Merge Request](#)
- [Older patches can still be found on SourceForge](#)
