Description

As of tiki 1.9.5, errors might occur when a link is inserted on the form **This is the link text**. This resulted in some strange behaviour for me where the title on the link got turned into a link when tiki parsed it etc.

<http://tikiwiki.cvs.sourceforge.net/tikiwiki/tiki/lib/tikilib.php?r1=1.514.2.271&r2=1.514.2.272&pathrev=BRANCH-1-9> describes how the text to display is found.

As per Tiki23 (since a while) links to pages without a description cause no problem.
