### Description

In tiki-admin\_notifications.php, if I am watching articles and wiki pages, I want to know more.

Should trigger watch notification email:

Edit article (needed: we don't need a nice diff compared to previous but I want to know who is editing existing articles. Tracker notification email is nice with old value/new value for each field)  
delete article (needed: if someone deletes by accident, I can recuperate from emails)

Edit wiki page (OK)

Rename wiki page (OK in 2.0)

Delete wiki page (needed: if someone deletes by accident, I can recuperate from emails)

Trackers:

Edit tracker item (OK)

Add a tracker item (OK)

Delete tracker item (needed: if someone deletes by accident, I can recuperate from emails) in trunk,

it sends an email about deletion but without a copy of the last content. As of 2009-02-25 and on 2009-04-22, it does send an email, but with a blank sender address and without a copy of the data which was just deleted.

Comments

Bernard Sfez / Tiki Specialist 19 Oct 21 11:01 GMT-0000

As per Tiki23 this feature request look valid to me however it touch several features and is not accurate as I see some notifications available. Please retest and if still needed create one or distincts request with updated informationso developer can evaluate how they can help.
